

WHAT WE'RE ALL ABOUT...

WELCOME

Whatcombe Farm Nursery is small nursery in a unique rural setting on the outskirts of Frome. We are a teacher-led team who follow the children's interests, inspiring both curiosity and independence. Our flexible approach to learning means that children are taught in a way that best suits them.

We also recognise the value of the outdoors in supporting our children's learning and wellbeing. Together we grow vegetables, care for our chickens and explore the changing seasons in our Forest School.

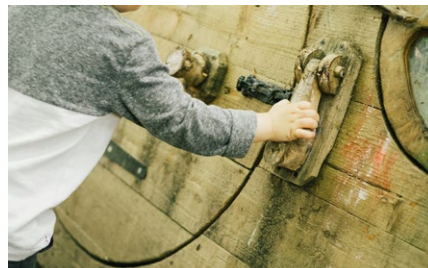

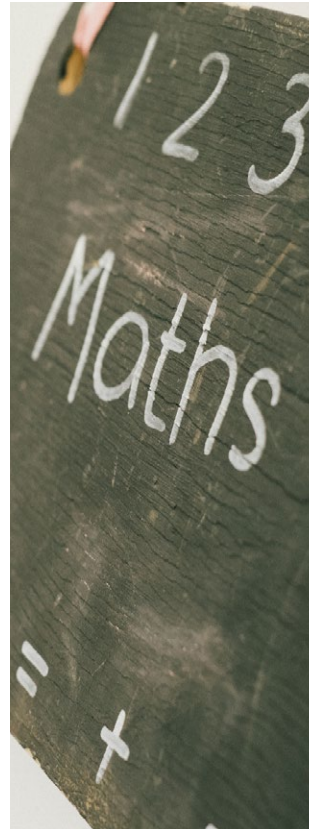

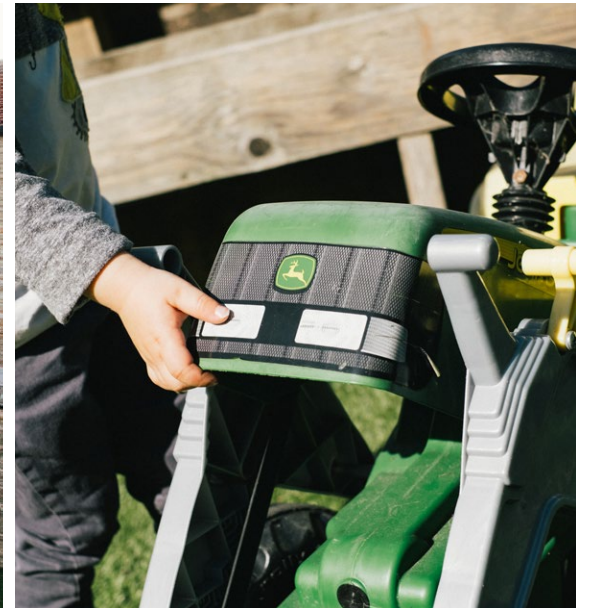

TOGETHER

We value and incorporate all aspects of our children's lives, building a strong partnership with our parents & carers, community and future schools.

We appreciate that our children have differing needs. These are accepted and met. Everyone is welcomed and catered for.

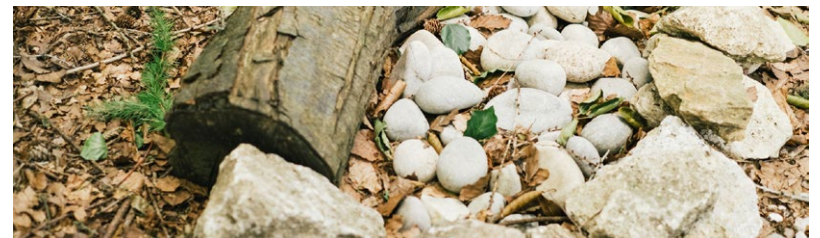

NUTURE

Our children are supported in their journey to being independent, responsible and caring citizens, who have a strong sense of respect for people and the environment.

We provide a safe, nurturing environment where every child and family is known, respected and valued.

CURIOSITY

We nurture our children's curiosity, following their lead in order to provide inspiring, stimulating & challenging learning opportunities for every child.

We foster a love of learning for children to take with them through their lives.
